

Operating from -40 up to +175°C, the PHT220 serie is dedicated to high temperature pressure measurements. With all stainless steel wetted parts, it is compatible with most media, including corrosive fluids used in automotive, aerospace and energy industries. Equipped with the premium thin film technology developed by EFE, its performances and stability over wide temperature range are excellent. The PHT220 is available with unamplified output (mV/V), compensated in temperature, up to ±0.005%EM/°C, to deliver the best accuracy. Amplified output (Vdc) is also standard, thanks to a high performance and ruggedized electronic module, remote in the cable in a stainless steel package.
